

Model: CVB03ED Series Belt Conveyor Oven

LEWCO Conveyor Ovens offer higher throughput compared to batch ovens, resulting in labor savings through increased material handling efficiency. These ovens are suitable for a variety of applications such as heat-treating, curing and drying. Belt conveyor ovens are the lowest cost and the most common type of conveyor oven. They are extremely versatile and widely used throughout industry. In addition to standard wire mesh belts, other special application belts are available. All LEWCO Conveyor Ovens are manufactured to meet the requirements of NFPA 86.
