

## **CONVEYOR OVENS**

## Model: CVR05ED Series

# **Roller Conveyor Oven**

LEWCO Conveyor Ovens offer higher throughput compared to batch ovens, resulting in labor savings through increased material handling efficiency. These ovens are suitable for a variety of applications such as heat-treating, curing and drying. Roller conveyor ovens sometimes referred to as roller bed ovens have the heaviest load capacity. A series of rollers, mounted in bearings with sprockets on one end are driven by a common drive chain (or series of chain loops) connected to a gear motor. This conveyor design can also provide zoned accumulation, allowing product to accumulate inside the oven. All LEWCO Conveyor Ovens are manufactured to meet the requirements of NFPA 86.
