(1) Tote High-Performance Oven, Steam LEWCO High-Performance Drum & Tote Ovens provide 25%

faster heat-up times and, by design, are safer than traditional Hot Boxes. These models employ a high-velocity fan, which pulls air from the oven workspace, circulates it over the heating elements, and then delivers it at a highly convective rate back to the oven workspace. The Standard Profile design features an insulated base with spill containment sump. As standard, High-Performance Ovens are designed and manufactured to meet the requirements of NFPA 86 Class B ovens. Applications involving the off-gassing of flammable volatiles may require additional safety features. Consult factory for non-standard features required for compliance with NFPA 86, Class A ovens.
